

EPA-CTNM-250 Series SDWAN Centralized Management

Antikor Integrated Cyber Security System EPA-CTNM-250 Series, SD-WAN Central Management System (CTNM), is a product that provides central management with advanced management functions. Centrally monitors and manages all Dual Layer SD-WAN products with flexible configuration, live dashboard, and advanced profile capabilities.

Profile Support

Central Management System manages multiple security policies under the name "Profile". Managed SD-WAN products can be subscribed to more than one profile. In this way, all managed systems can be included in the general security profile, and regional settings can be applied with specialized security profiles.

Performance

Operates your network with maximum performance while executing security functions. Provides enterprise networks security and network requirements easily and highly efficiently by its powerful network stack.

Batch Policy Management 🕞 -- 🖛 🚍 -- 🖓

Antikor Dual Layer SD-WAN Central Management System (CTNM) collectively applies your corporate security policy to the Antikor Dual Layer SD-WAN products you manage. It displays the accessibility status and notifications of the nodes you manage centrally on the map.

Management

Antikor CTNM can provide Update Server Service to Antikor SD-WANs connected to it from the Central Management, Configuration Template Management, Individual Management and Bulk Update Management.
